AND POLLUTION PREVENTION

JOHN E. PATCHETT
PREFENSE LLC
1602 MUSSEY STREET
MUSCATINE, IA 52761-

Dear Mr. Patchett:

Subject: Transfer of Pesticide Registrations From Company Number **70087** to
Company Number **91624**

Pursuant to your request in your letter and transfer agreement of June 12, 2020, we have approved the transfer of the following registrations from COATING SYSTEMS LABORATORIES, INC., company number 70087 to PREFENSE LLC, company number 91624.

The effective date of these changes is the date of this letter.

Registered Products	Old EPA Reg. No.	New EPA Reg. No.
ZOONOCIDE	70087-1	91624-1

You should indicate the new company designation, new EPA Registration Number and new Establishment Number (if it has changed) on the labeling at the next printing which should occur no later than 18 months after the effective date of this transfer. After 18 months, any product released for shipment must bear the new Registration Number and Establishment Number. If you intend to use the labels which currently appear on the transferor's product after the effective date of the transfer, but within the 18 month grace period, you must maintain complete and accurate records which identify by batch number, lot number, or other suitable description the quantities of such product bearing the transferor's label. Each container or package bearing the transferor's label which is released after the effective date of product registration transfer, must be clearly and accurately marked with the batch number, lot number or other descriptive designation used to identify the product in your records.

Supplemental distribution agreements of registered products do not transfer with the Section 3 registration. It is your responsibility as the registrant to notify any and all supplemental distributors of the transferred product(s) of this transfer agreement. If you wish to enter into supplemental distribution agreements of your product(s) under this new registration, the form "Notice of Supplemental Distribution of a Registered Pesticide Product," EPA Form 8570-5, must be submitted to the Agency for each supplemental distributorship.

You are required to contact your local EPA Regional Office to determine what effect this transfer of pesticide registrations has on the pesticide production establishment registration.

It will not be necessary to submit labeling for review if the only changes are in the company designation and the EPA Registration Number. Other changes in the product and/or labeling may require EPA review and approval prior to distribution or sale of the product containing the new registration number. In any correspondence on these products always refer to the U.S. EPA Registration Number listed above.

The transferred registration will have the same status under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, 7 USC 136 et seq., as it had prior to the approval of this transfer.

When registrations are transferred from one company to a second company, all restrictions, data requirements, conditions (suspensions), and deadlines existing on the registrations are transferred with the registrations. The new company is responsible for adhering to or complying with all such restrictions, etc. on the acquired products.

Regarding deadlines, the transferee company is responsible for submitting all required data according to the schedules already established for the acquired products. Failure to do so will result in the issuance of a Notice of Intent to Suspend. Requests from transferee companies for additional time to submit, because they acquired the registration(s) after the 3(c)(2)(B) request was issued will not be granted. If a transferee company has other valid reasons for delays in the testing which were clearly outside of their control, then such requests for time extensions will be considered in accordance with the established procedures. Transfers occurring while a 3(c)(2)(B) request is being issued or during the 90-day response time are subject to the same conditions expressed above.

Registration is in no way to be construed as an endorsement or approval of these products by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with FIFRA.

Furthermore, the transfer of the subject registrations is approved under the condition that the annual maintenance fee obligation has been fully satisfied. The annual maintenance fee is based solely on the total number of active section 3 and section 24(c) registrations held by the transferor. If the annual maintenance fee has not been fully satisfied, the transferee and transferor will be notified to comply within a specified time period, or the affected registrations may be canceled.

Sincerely,

Kimberly Smith, Chief
Information Services Branch

Re: Transfer of EPA Registration 70087-1 from Coating Systems Laboratories,
Inc. to Prefense LLC

Date: June 12, 2020

Dear Mr. Vaughn:

Coating Systems Laboratories (EPA Company Number 70087) requests that the U.S. Environmental Protection Agency transfer certain EPA registered products to Prefense LLC (EPA Company Number 91624).

A transfer document, executed by authorized representatives of both parties, provides the required documentation and affirmations delineated at 40 CFR §152.135(b) and (c) to effect this request for transfer of EPA product registrations. The Transfer Document is enclosed with this letter.

Under the terms of 40 CFR §152.135(d), I understand that the Agency will approve the transfer without requiring that the Transferee obtain new registrations and that the Agency will notify the Transferor and the Transferee of its approval of this transfer request.

Best regards,

I cannot answer a "blanket" question like that.
However, I can treat it as a Registration Only Transfer.
Do you wish to do so?

Thank you – there are no existing stocks in this case, and the new owner doesn't wish to use the old name, and the manufacturing facility has changed.
Just to confirm – there would be no negative consequences by temporarily taking this as a registration transfer and following up with Appendix A at a later date?

Yes. I can treat this as a "Registration Only" transfer.
Keep in mind that you have 18 months, from the date of transfer approval, to use existing stocks of product bearing the existing label.
Do you wish for me to treat this as A Registration Only Transfer?

Mr. Vaughn,

Thank you for your response. Time is of the essence for the transfer of this registration as Prefense wishes to make label amendments (new brand name/new logo design) for sales that are hoped to start in July.

Would it be possible to transfer the registration and follow up with the data transfer at a later date, in order to facilitate entry to market with the updated product name and label?

Ms. Edgar,

In your transfer submission received 06/22/2020, you state on the cover that this is a registration only transfer.

Yet, in the title and in Section 4 of the transfer agreement you request transfer of the data as well.

You state:

4. DATA ASSIGNMENT. Transferor does hereby irrevocably transfer to the Transferee all rights, titles and interest in the items of data named herein. All data that are part of this registration are hereby transferred, including any exclusive rights.

If data are being transferred then, please fill out Appendix A . Please address whether or not Exclusive use of each data item is also being transferred. If so, please include the date that the period of exclusive used ends (usually ten years from the date of first product registration that used that data). If none of the data are subject to exclusive use then, you may make a blanket statement that "None of the Data are Subject to Exclusive Use". You may state this in Section 4 or on the Appendix A list.

Please clarify whether or not you also wish to transfer certain data.

If so then, please attach "Appendix A" describing each data item that you wish to transfer.

See also 40 CFR §152.98.

For your convenience I have attached a sample Appendix A.

Please respond to this deficiency by 07/20/2020.
